

Data Driven System Transformations

Aras Jizan, Community Solutions

Solutions for Individual Homeless Adults, National Conference

February, 2020

COMMUNITY SOLUTIONS

works for a lasting end to homelessness that leaves no one behind. We envision a more equitable society where homelessness is never inevitable, inescapable, or a way of life.

Bottom Line Up Front:

1. Reducing and ending homelessness is possible & *happening*
2. Understanding what's actually driving improvements is *hard*
3. If our movement is going to succeed *we need to change our relationship to data*

Reductive Reducing Recipe

- A. Figure out what's working in these places
- B. Translate it to my context
- C. Reduce homelessness in my community

Easy as ABC... right?

THEN I TOOK A
STATISTICS CLASS.
NOW I DON'T.

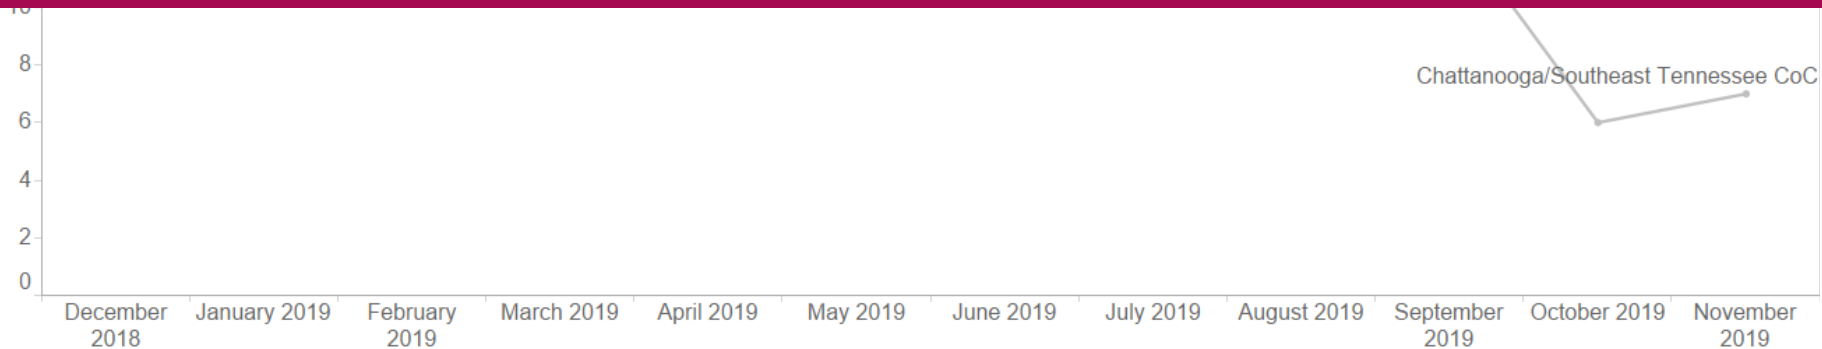

SOUNDS LIKE THE
CLASS HELPED.

WELL, MAYBE.

Chattanooga Veteran Homelessness in 2019

How can we get better at understanding the real story here so we can learn from it?

Solutions for Individual Homeless Adults, Oakland, CA || February, 2020

We need to change
our relationship to data

Common Uses of Aggregate Data

- Data for evaluation
- Data for research
- Data for advocacy
- Data for strategic planning
- Data to inform policy

Missed opportunity: data for improvement

Data for Improvement

- Purpose: to provide usable information for improving the processes represented in our working theory.
- Therefore, we need to consider:

What is measured:

Needs to be
closely aligned to
the actual work

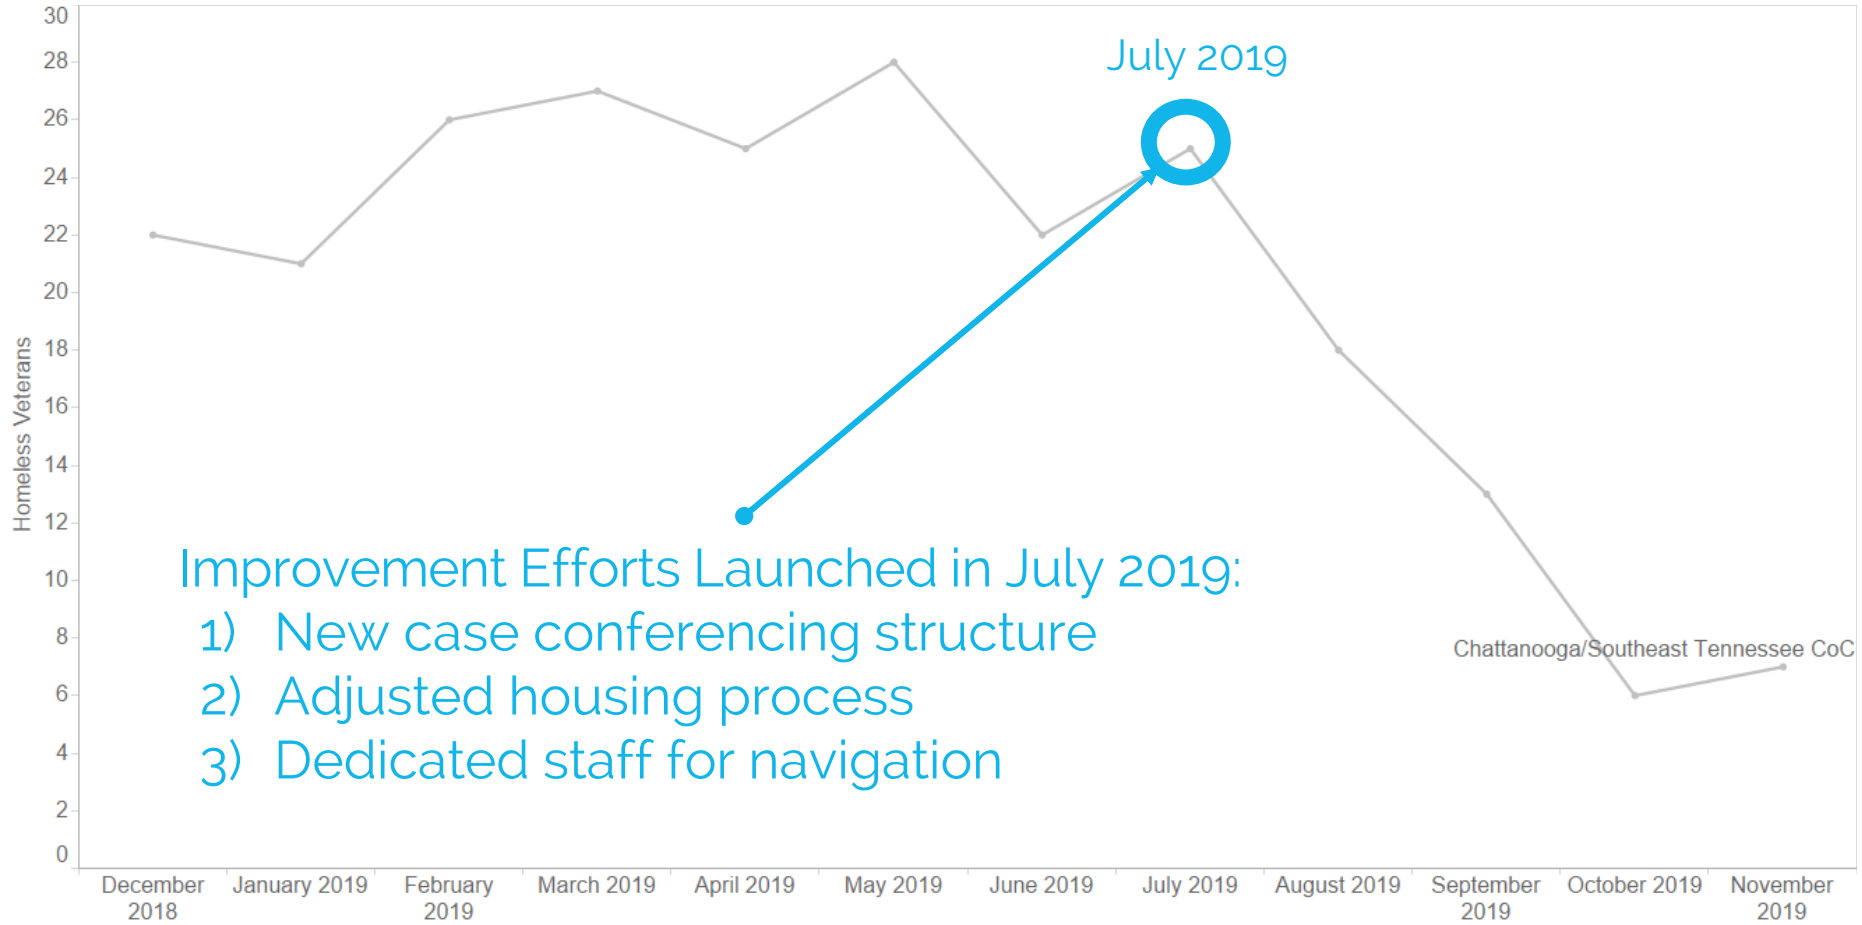

How & *when* it is
measured:

Needs to be
embedded in the
daily workflow

Social processes
shaping use:

Requires
transparency, low
stakes, and the
safety to take risks

Improving Case Conferencing

Test of Change:

- Segmented the 1-hour meeting into 20 minute blocks focused on: engagement, income maximization, and housing navigation

Result:

- Increased provider participation and helped identify two process bottlenecks

Tackling Process Bottlenecks

Test of Change:

- Instead of waiting to start housing search/navigation until after the income maximization phase, do processes in parallel

Result:

- Reduced the length of time between engagement and housing placement

Dedicated Staff for Navigation

Test of Change:

- Dedicate one outreach worker to specialize in housing navigation for whole team

Result:

- Decreased length of time homeless and increased housing placements

So What?

- Building more housing is hard, building better relationships + processes is easy*
- Every meeting is a chance to embed data for improvement in your team's work
- The people closest to the work (front-line staff, people with lived experience) often already know why things aren't working — ask them!
