connected emergency management
right people
right information
right time
When lives are at stake

You need an integrated solution capable of bringing together data, people and resources smoothly and quickly to manage complex situations.

Atos is uniquely experienced to deliver your fully integrated emergency management solution.
Global Emergency Management (GEMMA)

GEMMA is a specialised emergency management solution designed to help PSAP’s and Emergency Response Organizations deliver on their commitment to protect citizens and keep society safe. It helps emergency command and coordination centres prioritise calls and coordinates response between collaborating organisations using real-time geographic data and mobile technology.

It is an end-to-end solution designed for seamless integration with your existing platforms so wherever you are on your journey to a flexible and scalable response system, GEMMA from Atos provides a proven solution.

- Co-ordinates response between collaborating agencies
- Uses geographic and mobile information in real-time
- Multi-agency platform based on common industry standards and protocols
- Seamlessly integrates with your existing platform

- Live in Madrid with SUMMA 112
- Live for 112 Extremadura PSAP
- Co-ordinates real time response across all emergency services
- Co-ordinates over 12 million calls in Madrid region alone
- Integrated multi-channel communication
CityPulse is an innovative solution that uses big data analytics to deliver an intelligent incident response. By collating and analysing data that’s gathered from multiple sources CityPulse is able to deliver insights that enable a response to be triggered and managed in real time.

Intel technology means data can be gathered from a wide range of sources - from monitoring pedestrian movement, traffic, pollution levels, weather conditions, noise levels and even social media and mobile phone activity - to create a real time view of city situations.

**Insights from this data can be used to provide emergency services with bespoke situation dashboards, or for non-emergency situations, trigger pre-defined automated responses such as changing a variable speed limit as a traffic-calming measure.**

- Easily adaptable for many city challenges

- Live in Eindhoven, Netherlands

- Uses big data analytics for real-time incident management

- Gathers data from multiple sources
About Atos
